

The OneTribe Member Portal allows for Tribal Members to access a secure public facing website for application intake and communication with Tribal Services Programs to increase access and efficiency with application approvals and service deliveries.

Every member sets up their Member Profile through a web application. Normally an enrollment department is part of the Portal Account approval process to ensure Members are verified before accessing their Portal Account.

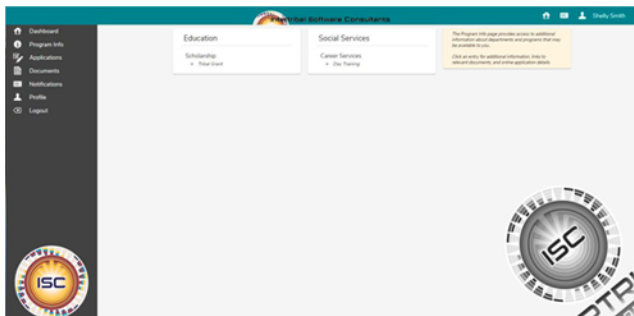

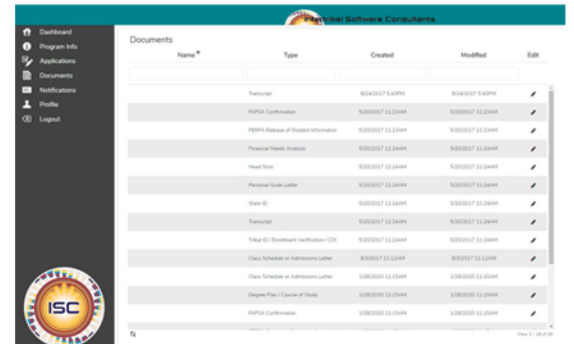

Applications can be created for different tribal programs. Each application can have an open and close dates that can be configured. Each application can have required documents that must be uploaded before the application will submit.

As Members can see all pending and approved applications from one screen from the Dashboard.

Member Portal is integrated to OneTribe. As applications come in from the Portal, each department user and send notifications to the Member. The Member receives an email notifying them they have a pending message.

Member Portal has a document management module that allows members to upload electronic documents. Once those documents are uploaded, they are downloaded into Laserfiche for that department and Laserfiche Workflows are initiated.

Departments can post program specific information documentation about eligibility requirements, funding resources and program policies. This provides a private area to communicate this information to members versus the Tribal Website that is viewable for non-members to see.
